Access from non-UCB computers

The campus USENET newsgroup server is news.berkeley.edu. This server restricts access to UC Berkeley campus computers only, so it will deny access if you are using your own ISP.

Ways to work around this restriction:

1. Use our password-protected WEB site:
<http://inst.eecs.berkeley.edu/webnews>; accesses news.berkeley.edu only.
Requires an Instructional UNIX login/password <#accounts>.

2. Login to a UNIX system on campus:

For example, you could "ssh" into "cory.eecs.berkeley.edu" and type "rn ucb.class.ee143" to read that newsgroup.

More about these instructions are in the following website.

<http://inst.eecs.berkeley.edu/connecting.html#news>
